Health Beliefs in Obsessive Compulsive Disorder (OCD)

Do you have an adult* family member with OCD?

If yes and you are a UK resident over 16 years of age, we would like to invite you to take part in a research interview, which is being carried out as part of a PhD project at the University of Manchester.

We are hoping to learn more about family member experiences of OCD. We would like to invite you to take part in a confidential interview, where we would discuss these experiences.

We will ask you some questions about:
- Your experiences and knowledge of OCD
- How OCD impacts you and your family
- Your support needs

This research will help us to understand what helps families to cope with the mental health problem. We hope that this information will lead to a better understanding of the kind of support needed by both people with OCD and their family members.

Please note that we require the consent and participation of your family member with OCD before your interview can take place.

*The person with OCD must be at least 16 years of age.

To find out more about the study, please contact Rebecca Pedley (Research Associate) on
